

My XM satellite radio is irreplaceable to me and my husband. We are truckers and drive across country from North Carolina to California around three times a month. The weather and traffic channels are so helpful and informative we don't know how we ever got along without them. We are able to stay updated on current happenings around the world and also avoid dangerous traffic and weather situations, in most states that we travel through.

My husband and I strongly urge you to give considerable thought to reject the NAB's petition 04-160. This is a privilege that we should never have to give up. The price is very reasonable and this type of programming should always be available to anyone who wishes to purchase it
